

Press Release

Gray, France – 15 February 2021

Autosun® 2 BHZ, the SIMU solar solution with information feedback

The new Autosun® 2 BHZ solution benefits from our 15 years of experience in the development of solar solutions. It is equipped with a smarter motor with information feedback labelled Act for Green and still has all its main advantages: 7-year warranty on the solar kit, 45 days of autonomy in total darkness, soft start&stop function, aesthetic solar panel and easy-to-mount batteries.

THE 3 MAJOR ADVANTAGES OF A SIMU SOLAR SOLUTION

- **No work**, no wires to run, so no damage to the interior decoration
- **100% autonomous** and no power consumption
- Suitable for **all types of roller shutters** regardless of the installation (renovation or new, roof or façade shutters)

To bring this solution to the attention of both the general public and installers, SIMU has launched a dedicated website, www.autosun.eu

You can also read a specialised article on the SIMU blog <https://www.simu.com/en/5-advantages-of-autosun-which-will-please-your-customers/>

THE NEW FEATURES OF AUTOSUN2 BHZ

- **Information feedback**: this new generation motor enables you to know the position of the motor in real time thanks to Livein2, the SIMU connected solution. Convenient to check remotely if your shutters are closed!
- **An ecodesigned product**: labelled “Act for Green”, meaning a sustainable, responsible solution, this new range has been developed according to ecodesign principles. Know more about Act for Green <https://www.somfy-group.com/en-en/commitment/sustainable-development>

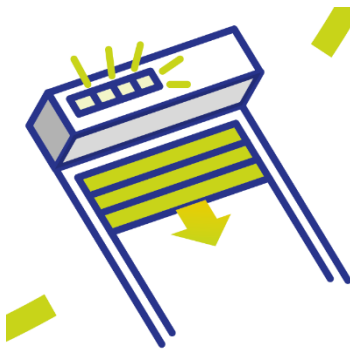

THE STRONG POINTS OF AUTOSUN2 BHZ

This AUTOSUN range retains its valuable advantages that make it stand out on the market, such as:

- A **7-year warranty** on the motor, panel and battery kit
- **45 days of autonomy** in total darkness
- A gentle stop on opening and closing with the **soft start - soft stop** function
- An **aesthetic solar panel** and **easy-to-mount** batteries

THE 3 COMPONENTS OF THE SIMU SOLAR SOLUTION

- **A solar panel**, which transforms the sun's energy into electricity. It has a discreet, elegant design and is attached by **rivets or adhesive**.
- **A battery** which stores the energy transmitted by the solar panel. With or without an aluminium cover to mount it **inside or outside the casing**.
- **A direct current motor**, which uses the energy stored in the battery to operate the shutter. This **smart radio** motor, with stop-on-obstacle and frost detection, has four end limit adjustment modes.

These products are available from March 2021.
