## Keypad Hz 2C: control your garage door with confidence!

SIMU extends its offer with the Hz 2C keypad for garage doors.

While its discreet, modern look blends perfectly into the environment, its functions make it simple and secure to use: two channels, a main or secondary code, automatic locking of the keyboard in case of attempted intrusion, keypad sounds and backlighting.

Last but not least, it is practical to install, thanks to its captive screw, and easy to configure: just three steps to set or change the code.

### A DISCREET, MODERN DESIGN

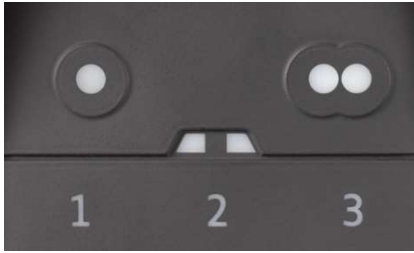

With its anthracite look and compact size, this keypad blends seamlessly into your facade.

Its silky coating is soft to the touch and its rain hood protects it from bad weather.

The keypad backlighting means it can be used day or night.

The sounds produced by the keys can be configured - practical.

#### **SIMPLE, SECURE USAGE**

The Hz 2C keypad has two channels, enabling two devices to be controlled, e.g. a garage door and a gate, using the facade buttons.

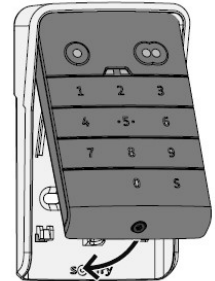

It provides one main code to open all the channels and change the settings, and a secondary code to restrict control to a single channel - practical for an external contractor, for example.

Last but not least, this product protects you against unauthorised entry, as the keypad automatically locks after several unsuccessful attempts.

#### **EASY TO INSTALL AND PROGRAMME**

Simply assemble the two pre-mounted elements and attach them using the captive screw...that's all there is to it!

What is more, it has never been so easy to configure or change the code: just three steps using the set and reset buttons.

#### **COMPATIBILITY**

This product is compatible with the SD100 Hz control box and the GM range of garage door motors.

It can control a gate fitted with another radio technology when combined with the Simu standard receiver.

**This product is available in France with the reference 2009771.**
