

Press Release

Gray, France - 25 January 2021

SIMU presents their 3 star innovations at the digital edition of R+T 2021

A NEW OPPORTUNITY TO INTERACT WITH OUR CUSTOMERS AND PARTNERS!

Thanks to this new format of R+T Stuttgart, we are pleased to be able to meet our customers and partners, although it cannot replace the physical exhibition where we used to have the pleasure of welcoming them in person.

Participation in the exhibition is possible from anywhere in the world, so our 4 avatars will be ready to welcome all visitors worldwide, from 9 am to 5 pm, February 22nd to 25th.

There will be a live presentation of our new products every day from 1:45 pm to 2:15 pm, in French and English, when we will answer questions directly.

And in the exhibitors' forum, you can discover Simu in an original way through our employees' video testimonial!

3 NEW STAR PRODUCTS IN THE SPOTLIGHT

AUTOSUN BHZ, THE SOLAR RADIO SOLUTION WITH FEEDBACK

With this new generation of motors, you can know **the position of the motor in real time** thanks to Livein2, the Simu connected solution. In addition, it is labelled "**Act for Green**", which is a sustainable responsible solution developed according to the principles of eco-design.

AUTOSUN retains its valuable advantages that make it stand out on the market, such as:

- A **7-year warranty** on the motor, panel and battery kit
- **45 days of autonomy** in total darkness
- A gentle stop on opening and closing with the **soft start - soft stop** function
- An **aesthetic** solar panel and an **easy-to-mount** battery

And all the benefits of a solar radio solution:

- **No work**, no wires to run, so no damage to the interior decoration
- **100% autonomous** and no power consumption
- Suitable for all types of roller shutters regardless of the installation (**renovation or new, roof or façade shutters**)

T5 AUTO BHZ AND T5S AUTO BHZ - FULLY AUTOMATIC SETTING

This range of electronic motors **has intuitive programming**, thanks to the **automatic mode** that sets the limit switches.

The **functions are complete**:

- Obstacle and frost detection
- Limit switch stress relief function
- Intermediate position

In addition, because of the **star head**, the T5S allows manufacturers to **rationalise components** due to the compatibility with star head brackets, one of the market standards.

SIMUDRIVE CONTROL BOXES

A control box dedicated to every need! Whether it is a garage door or an industrial door, we have the solution!

SD100Hz: the radio solution for rolling garage doors.

- Adjustment in less than 2 minutes thanks to 4 pre-set parameters
- Safe wiring because the 230V zone is separated from the 24V zone
- The possibility to connect all the safety accessories that are essential for the user

SD350: indispensable for three-phase motors.

- Fast installation thanks to clearly identified connections
- Go to the essential: control by pushing and holding in position or in mixed mode only

SD510: the complete solution for industrial doors.

- It is versatile and adapts to all configurations of doors and motors (curtains, grills, sectional or high-speed door; motors with mechanical or electronic limit switches)
- Easy to install thanks to plug-in terminal blocks and pre-saved programming

About SIMU

Specialised in the design, manufacture and marketing of motors, command systems and accessories for doors, windows and solar protection systems, we propose comprehensive, reliable and innovative solutions for professionals, manufacturers & installers of roller shutters, blinds, garage doors and doors for stores and industrial buildings.

For over 65 years, SIMU has dedicated its expertise to helping its customers. As committed partners, we develop close relationships with our customers on a daily basis to provide them with the most adapted advice and solutions.
