SD 100Hz : the new SIMU radio control board for rolling garage doors

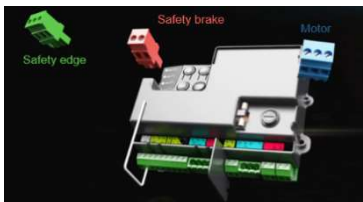

Control your garage door safely!

SIMU is expanding its range of SIMUDRIVE control units with the latest addition to the range, the SIMUDRIVE SD100Hz, intended for rolling garage doors.

This box offers a secure radio solution and will seduce you with its ease of installation and configuration.

EASY WIRING

Thanks to clearly identified connections, and a dedicated and removable terminal for each element, wiring becomes child's play. Security is also reinforced thanks to a 230V area separated from the 24V area.

SETTINGS WITH PEACE OF MIND

Only 4 parameters to be set, and already configured by default to use a classic mode!

Thus, the adjustment is completed in less than 2 minutes, allowing a considerable time saving.

THE ASSURANCE OF A COMPLIANT AND SAFE INSTALLATION

Control board SD100Hz allows to connect a safety brake, a safety edge (optical or resistive), 2 sets of photocells in the bottom position, an orange flashlight and/or a area lighting.

Thus providing the opportunity to observe scrupulously the European standards.

EXTENDED COMPATIBILITY

Compatible with single-phase motors < 1100W, the control board SD100Hz can be associated with SIMU T5, DMI5, T6, DMI6, T8, T8M, T8S, T8SDMI and CENTRIS ranges.

It can be controlled from TSA Hz or from SA Hz radio keypad, and is compatible with the following safety accessories: safety brake, photocells, safety edge, flashing light / lighting

This product is available under the reference 2009612.
